¹ Larcenies not separately reported. Figure listed includes both major and minor larcenies.

² Figures include offenses committed by juveniles; this is in accord with the uniform reporting procedure followed by other cities.

Supplement to Return A Data

More than \$96,000,000 was taken by thieves during 1946 in 295 cities with over 25,000 inhabitants representing a combined population of 32,865,574 covered in an analysis of supplementary crime reports received by the F B I. The figures include 26,484 robberies at an average value of \$160 per holdup, 142,032 burglaries in which the average value of the loot was \$133, 84,252 automobile thefts at \$638 per car and 326,878 larcenies with an average of \$59 per crime. The police, on the other hand, recovered 94.7 percent of the stolen cars and 21.3 percent of other stolen property.

The heaviest robbery increases in 1946 were among those involving business establishments. These crimes rose 45.0 percent in the 295 cities represented in the following tabulations. As a result of a 15.2 percent increase in the total number of robberies and an 8.8 percent increase in the average value of property stolen per offense, the total loot taken in robberies rose 26.1 percent in 1946.

Increases were recorded in burglaries of all types as follows: Residence—night, 11.9 percent; residence—day, 6.2 percent; nonresidence—night, 10.0 percent; and nonresidence—day, 12.4 percent. These increases were accompanied by a 12.7 percent increase in the
