<sup>1</sup> Larcenies not separately reported. Figure listed includes both major and minor larcenies.

<sup>2</sup> Figures include offenses committed by juveniles; this is in accord with the uniform reporting procedure followed by other cities.

### Supplement to Return A Data\*

In combating crime it is important for police to know not only the total number of crimes occurring but also the nature of the criminal acts, time and place of commission, and value of property stolen. Such detailed information was furnished the F B I in 1947 by 355 cities over 25,000 in population.

Over 80 percent of the 174,744 burglaries investigated by the police occurred at night while almost 59 percent (102,331) involved business houses and other nonresidence structures. Although 23,786 (32.8 percent) of the residence burglaries occurred during the day, only 10.3 percent (10,521) of the nonresidence burglaries were perpetrated during daylight hours.

Victims of 22,436 (68.6 percent) of the 32,706 robberies in these cities were held up or strong-armed in their homes or on sidewalks, streets, and public highways. Places of business were robbed by force or threat in 8,449 (25.8 percent) of the cases reported to the police.

Thefts of property from autos including accessories numbered 134,486, almost one-third of the total thefts reported by these cities.
