† Larcenies not separately reported. Figure listed includes both major and minor larcenies.

* Figures include offenses committed by juveniles; this is in accord with the uniform reporting procedure followed by other cities.

Supplement to Return A Data.

A detailed analysis of the crime situation for several offense classes is made possible by supplementary reports forwarded monthly to the FBI by the larger police departments throughout the country, and summaries of the available data are shown in tables 32–34.

The figures reflect that forcible rapes, constituting 62.5 percent of the 1944 rape offenses, increased 12.3 percent, while statutory offenses (no force used—victim under age of consent) declined 2.5 percent.

Highway robberies and those involving oil stations, chain stores, and residences increased in 1944, while robberies of commercial houses, banks, and the miscellaneous group decreased. Although the robbery total for 1944 is smaller than the figure for the previous year, the value of the loot obtained by holdup men in the average offense rose 19.6 percent from \$94.26 in 1943 to \$112.74 in 1944. Thus, table 33 shows a 2.0 percent decrease in the number of robbery offenses in the cities represented, and at the same time an increase in the total value of property stolen from \$1,818,074.21 in 1943 to \$2,131,978.96 in 1944.

Nighttime burglaries showed an increase last year with a 6.2 percent rise in residence offenses committed during the night and a 4.3 percent
